SAVE THIS MANUAL FOR FUTURE REFERENCE

SAVE THESE INSTRUCTIONS

WARNING: WHEN USING ELECTRIC TOOLS BASIC SAFETY PRECAUTIONS, INCLUDING THE FOLLOWING, SHOULD ALWAYS BE FOLLOWED. TO REDUCE RISKS OF FIRE, ELECTRIC SHOCK AND PERSONAL INJURY, START BY READING THESE IMPORTANT SAFETY RULES.

DOUBLE INSULATION - SAFETY PLUS...

Double insulated construction and shock proof housing assure protection from electrical shock with an extra layer of electrical insulation plus the primary insulation system. Even if the primary system fails, the secondary barrier protects you. Double insulated tools do not require three-wire grounding. This tool is equipped with a two prong plug and does not require a grounding adapter.

GUARD AGAINST ELECTRIC SHOCK. OPERATE THE BUFFER/POLISHER ONLY IN A CLEAN, DRY AREA. RUBBER FOOTWEAR IS RECOMMENDED WHEN WORKING OUTDOORS.

AN EXTENSION CORD CAN BE PURCHASED FROM YOUR LOCAL HARDWARE STORE (OR CALL OUR TOLL FREE NUMBER LISTED BELOW). REPAIR OR REPLACE DAMAGED CORDS.

DO NOT OPERATE TOOL IN PRESENCE OF FLAMMABLE LIQUIDS OR GASES.

DO NOT PUT FINGERS, OBJECTS OR TOOLS BETWEEN GUARD AND PAD HOLDER WHILE MACHINE IS RUNNING. ALWAYS START AND STOP POLISHER AGAINST CAR SURFACE. OTHERWISE THE BONNET COULD BE THROWN FROM THE PAD.

KEEP CHILDREN AT A SAFE DISTANCE FROM THE WORK AREA.

AVOID ACCIDENTAL STARTING. KEEP FINGERS AWAY FROM SWITCH WHEN CARRYING PLUGGED-IN POLISHER. DISCONNECT TOOL WHEN NOT IN USE OR WHEN SERVICING WITH REPLACEMENT PARTS.

ALWAYS WEAR EYE PROTECTION AND PROPER CLOTHING (NOT LOOSE OR BULKY). DON'T WEAR ANY LOOSE JEWELRY. DON'T OVERREACH. KEEP PROPER FOOTING AND BALANCE AT ALL TIMES.

MAINTAIN TOOL WITH CARE. KEEP HANDLE DRY, CLEAN AND FREE FROM OIL AND GREASE. IF YOUR POLISHER NEEDS REPAIR, USE ONLY IDENTICAL REPLACEMENT PARTS ILLUSTRATED AND LISTED ON PAGES 5 AND 6.

DON'T ABUSE THE CORD. NEVER CARRY THE TOOL BY ITS CORD OR YANK IT TO DISCONNECT IT FROM THE RECEPTACLE. KEEP CORD FROM HEAT, OIL AND SHARP EDGES. INSPECT CORD PERIODICALLY AND IF DAMAGED CALL THE TOLL FREE NUMBER LISTED BELOW FOR REPAIR INFORMATION.

WHEN NOT IN USE KEEP TOOL LOCKED UP (OR HIGH AND DRY), AND OUT OF THE REACH OF CHILDREN

DON'T FORCE THE TOOL. GRIP THE POLISHER FIRMLY BUT WITHOUT DOWNWARD PRESSURE. PRESSING TOO HARD WILL SLOW DOWN THE MACHINE'S MOVEMENT AND AFFECT THE QUALITY OF THE WORK.

DO NOT OPERATE TOOL IF GUARD IS DAMAGED OR IF THE SWITCH DOES NOT TURN TOOL ON AND OFF. REPLACEMENT PARTS ARE AVAILABLE AS SHOWN ON PAGES 5 AND 6. CALL OUR TOLL FREE NUMBER LISTED BELOW FOR REPAIR INFORMATION.

CARE AND MAINTENANCE OF YOUR POLISHER

1. Bonnets can be machine-washed in cold water with a small amount of detergent on a few minute cycle; then machine-dried at medium heat. **HOWEVER**, hand washing and air drying is recommended for longer bonnet life.
2. To prolong pad life and shape, **always store polisher with pad face up.**
3. Remove bonnet from pad when polisher is not in use so that pad can dry out and retain its original shape.
4. The cleaning and waxing products included with your polisher will easily do a large car. Badly oxidized paint may require several applications. Replacement supplies in larger size containers are available. (See Page 7). **DO NOT USE ABRASIVE COMPOUNDS.**
5. **The most common error is applying too much wax and professional polishing solution. If pad becomes saturated, it will not last as long. AND POLISHING WILL BE MORE DIFFICULT AND TAKE LONGER.**
6. If bonnet continually comes off pad, you may be using too much wax and professional polishing solution.
7. If wax seems difficult to buff, you may have used too much wax.
8. Use only mild soap and a damp sponge to clean polisher. Do not immerse any part in liquid. If polisher needs repair, use only identical replacement parts illustrated and listed on Pages 5 and 6.

CAR CARE TIPS

1. Wash and polish the car 3 to 4 times per year to ensure paint protection.
2. Wash the car at least every 2 weeks, preferably with Waxmaster Professional Car Wash Solution which will not harm the finish or strip the wax. Avoid washing with household detergents.
3. Wash with a clean sponge and dry with a soft, clean terry cloth towel to prevent dirt from scratching the paint. Start on the top and work down.
4. Remove bugs, bird droppings, tree sap and tar daily from the car's surface.
5. Make sure the surface of the car is cool before washing.
6. Avoid parking near sprinklers. Water spots are difficult to remove.
7. To keep glass cleaner chemicals away from painted surfaces, spray onto a towel, not directly on the window.

FOR IMMEDIATE SERVICE CALL OUR S.O.S. HOTLINE™

1-800-528-9131

**HOURS: 7:00 a.m. TO 3:30 p.m. (Mountain Standard Time)
MONDAY Through SATURDAY**

WAXER/POLISHER INSTRUCTIONS

Before you begin, make sure your car is clean and dry. Use the car wash liquid provided. The work area should be dry also.

1. Place clean bonnet on pad as shown (A). Make sure the elastic is tucked down securely and evenly around underside of pad.

2. Spread about a heaping teaspoonful of wax evenly over the entire surface of the bonnet (B).

3. Apply about three swirls of professional polishing solution over the wax on bonnet (C). **DO NOT APPLY DIRECTLY TO CAR.** This first application should do 1/3 of the car. For the second and third applications of wax and professional polishing solution, use half the quantity of each stated above. Bonnet will not absorb as much when reloading.

4. **ALWAYS START AND STOP THE POLISHER ON OR AGAINST THE CAR SURFACE (D).**

Place extension cord over shoulder and do flat surfaces first—hood, trunk and roof. Cover areas quickly with broad, sweeping strokes in a criss-cross pattern. **DO NOT PRESS DOWN ON POLISHER. THE MACHINE'S ACTION, NOT PRESSURE, DOES THE BEST JOB.**

WAXER/POLISHER INSTRUCTIONS (continued)

5. After flat surfaces are covered with wax and professional polishing solution, do sides of car (E). If necessary, remove road tar with a general cleaner before polishing. Also, remove excess grease spots, bug stains, etc. Hold polisher as shown. Let cord hang free. It is not necessary to use criss-cross motion on doors and fenders.

6. Finally, remove bonnet (F) and hand polish all hard-to-reach surfaces; under the bumpers, around the door handles, etc. (G)

7. Put a clean bonnet on the polisher (H). Buff the car surfaces in the same order as the wax and polishing solutions were applied. Use long, sweeping strokes in a criss-cross pattern. Do not press hard. Let the polisher do the work (I).

WAXMASTER ONE YEAR WARRANTY

This product carries a one year warranty from the date of purchase against defective parts and workmanship. Warranty does not cover damage due to mishandling or abuse.

If this product is used for commercial or rental purposes, this warranty applies for only 90 days from date of purchase.

Get a mirror-like shine in half the time with the Waxmaster™ two-part system.

Do it in a single application with the Waxmaster® Waxer & Polisher and these professional Waxmaster™ products.

1 Waxmaster Professional Wax

SPECIALLY FORMULATED FOR USE IN COMBINATION WITH WAXMASTER PROFESSIONAL POLISHING SOLUTION

Contains more than twice the amount of wax found in conventional pre-softened waxes. Natural carnauba wax and non-abrasive cleaners to protect and beautify your car. Protects against dust, dirt, sand, air pollution and road grime. Gives car finishes a hard, mirror-like shine. Provides a tough, protective coating that can be buffed to a high gloss.
Model W70

+

2 Waxmaster Professional Polishing Solution

SPECIALLY FORMULATED FOR USE IN COMBINATION WITH WAXMASTER PROFESSIONAL WAX

Waxmaster Polishing Solution is safe for all finishes, including clear coat. It cleans the surface of road film, dirt, grime and removes oxidation to give Waxmaster Wax a perfect base for a rich, hard shine. The special formulation goes into pores, hides scratches and imperfections. Contains Carnauba wax to provide durability and resistance to detergents.
Model W60

= PROFESSIONAL RESULTS

These other quality Waxmaster professional products make the job even easier.

Waxmaster Professional Car Wash Solution

Maintain your car's beautiful finish with regular washings using Waxmaster Professional Car Wash Solution. Unlike some harmful household detergents, this safe and gentle formula won't damage car finishes or remove wax. A special coconut derivative provides lubrication and minimizes scratching caused by dirt particles. This biodegradable and phosphate-free solution floats away film, dirt and grime, leaving your car clean and shiny.
Model W50

Waxmaster Terry Cloth Bonnets

9" size for use with Model 900 Random Orbital Waxer and Polisher. Custom tailored and a perfect fit. Washable and reusable.
Model W80

11" size for use with Model 1100 Random Orbital Waxer and Polisher. Custom tailored and a perfect fit. Washable and reusable.
Model W85

Chamberlain is the world's largest manufacturer of quality garage door openers.

MODEL 550
1/2 H.P. Heavy-Duty
Our very best

MODEL 450
1/2 H.P.
Performance
at a budget price

MODEL 350
1/3 H.P.
Top features with a
1/3 horsepower motor

MODEL 240
1/3 H.P.
Delivers great performance
at an economy price

MODEL 140
1/4 H.P.
A great value for
the economy minded

... All with these value-added features

- Heavy-duty chain drive with solid-steel T-rail and rugged motor for years of dependable, trouble-free operation
- Automatic Safety Reverse—Garage door automatically reverses direction if obstructed going down and stops if obstructed going up
- Timed Light Delay—Light stays on 4-1/2 minutes for safe entry into the house and then turns off automatically
- Emergency Release/Automatic Reconnect—Allows manual door operation in case of power failure. Push button to automatically reconnect when power is restored
- Constant Door Control—Stops at any height for safety and ventilation with a push of the button

... Premium quality storm/screen doors, too. In a wide variety of styles, finishes and features to complement any entryway

... All with these convenience and security features

- Solid, heavy-duty mainframes with reinforced corners for added support
- Unique, quick-hang design for easy left or right-handed installations
- Tempered safety glass with interchangeable screen inserts
- Many have keylocking pushbutton latches and thumb-turn deadbolt locks
- Energy-saving heavy-duty deluxe pile weatherstripping and dual vinyl bottom sweeps
